AVOID A STROKE

Residents living in and around the Warren, Ind, community can be screened to reduce their risk: of having a stroke. Life Line Screening will be at the Knight Civic Center on August 16th. The site is located at 132 Nancy Street in Warren. Appointments

will begin at 9:00 a.m.

A stroke, also known as a "brain attack", is ranked as the third leading killer in the world, and the second among women. Through preventive screenings, the risk of having a stroke can be greatly reduced.

Screenings are fast, painless and low cost. They involve the use of ultrasound technology, and scan for potential health problems related to: blocked arteries which can lead to a stroke, aortic aneurysms which can lead to a ruptured aorta, and hardening of the arteries in the legs, which are a strong predictor of heart disease. Also offered for men, and women, is a bone density screening to assess their risk for osteoporosis.

"We are so thankful and feel so fortunate for the Life Line Screening program. Perhaps it saved my husbands life." Mrs. Peg Yarnelle, Wabash, Ind.

Each screening requires ten minutes or less to complete. A complete vascular screening package, including the Stroke/Carotid Artery, Abdominal Aortic Aneurysm and Ankle Brachial Index (hardening of the arteries) screenings is \$109. Sign-up for a complete vascular package; include the osteoporosis screening and pay only \$129.

Life Line Screening was established in 1993, and has since become the nation's leading provider of vascular screenings. Over 60 ultrasound teams are on staff to travel to your local community, bringing the screenings to you. These non-invasive, inexpensive and painless, ultrasound tests help people identify their risk for stroke, vascular diseases or osteoporosis early enough for their physician to begin preventive procedures.

For more information regarding the screenings or to schedule an appointment, call 1-800-697-9721. Pre-registration is required.

Bethel Church is located at 4500 E 300 S Bluffton, IN 46714, (260) 824-4547 and is pastored by Dr. Patrick J. Harris.

HAPPY HATTERS

Due to a sudden rain storm, the Van Buren Happy Red Hatters went to the home of Donna Zent, not the campground as planned.

A weiner roast was still held for all attending, Janet Hunnicutt, Shelby Goff, Mary Ellen Hawkins, Lana Stuber, Wauneta Bald, Shirley Shinholt, Norma Briner, Paula Shepherd and hostess Donna Zent.

Grace was given by Donna.

After a delicious lunch, Wauneta Bald, Queen Mum held a short meeting. Plans were made for Red Hatters to ride in the Popcorn Festival Parade. All gals riding should meet at Ferguson's corner at 6:30.

Donna was asked as a contributor to the Garfield Project to

be on stage for the dedication at 6:15, just before the parade Thursday August 10th.

Donna shared, the group had been invited to take a boat ride on Wauwaussee Lake in Syracuse on August 8th. After much discussion, it was decided to not go this year due to our Popcorn Festival being that week and all ladies were busy with other activities. The birthday song was sung for Shelby Goff.

The next meeting will be August 24th leaving the Christian Church at 11:30 for Ci Ci's Pizza in Marion.

New member Paula Shepherd was welcomed into the group. Paula is the daughter of Norma Briner.

HEAT SAFETY

The American Red Cross of Huntington County would like to remind our community to take extra care to avoid heat-related illness during this period of extreme heat. Please follow the heat safety tips below, and if you suspect heat-related illness in yourself or others please consult your physician immediately.

Heat Safety Tips

When a heat wave happens:

· Slow down. Avoid strenuous activity. If you must do strenuous

activity, do it during the coolest part of the day, which is usually in the morning between 4 a.m. and 7 a.m.

· Stay indoors as much as possible. If air conditioning is not available, stay on the lowest floor, out of the sunshine. Try to go to a public building with air conditioning for several hours each day.

· Wear lightweight, light-colored clothing. Light colors will reflect away some of the sun's energy.

· Drink plenty of water regularly and often. Your body needs water to keep cool.

· Drink plenty of fluids even if you do not feel thirsty. Water is the safest liquid to drink during heat emergencies. Avoid drinks with alcohol or caffeine in them. They can make you feel good briefly, but make the heat's effects on your body worse.

· Eat small meals and eat more often. Avoid foods that are high in protein, which increase metabolic heat.

Two new studies published in the Archives of Internal Medicine show that people with low thyroid activity, even at the subclinical level, are at a higher risk for heart disease. While neither study actually proves that thyroid dysfunction causes heart disease, this is another reason to have a thyroid test, especially if you are older and even more so if you are a woman. A simple blood test can tell the thyroid activity level.

GUARD BLOOD PRESSURE: SLEEP

Columbia University researchers give a new reason why it's important to get enough sleep. They find that adults who sleep less than five hours a night are twice as likely to develop high blood pressure compared with those who get seven to eight hours.

To sleep better, they recommend getting some exercise (at least three hours before bedtime), drink herbal tea instead of drinks that contain alcohol or caffeine, and try to go to bed at the same time each night.

FEEL STRONGER, TRY TAI CHI

Tai chi is a movement therapy that's excellent for everyone but particularly for those with arthritis or balance and movement problems. It lowers blood pressure, improves flexibility and cardiovascular fitness, and fights fatigue.

Many fitness centers offer classes, but beginners can also benefit from using one of the many tai chi CDs on the market to get into started. Those who haven't exercised at all should consult their doctors before using the program.

TOOTH TIPS

By: Dr. Kevin J DeaKyne DDS, PC
 What is Squamous Cell Carcinoma

This is the most common type of oral cancer. Malignant tumors, or carcinomas are not a common oral problem, but they do occur. Smoking, excessive alcohol consumption, irritation from jagged teeth or ill-fitting dentures or partials and excessive exposure to sunlight can all contribute to the development of a tumor. About 7% of all malignancies occur on the lip, cheek, tongue or floor of the mouth. The lesion may begin as a small white area that develops into an ulcer. At the beginning and sometimes in an advanced stage, the lesion may be painless even though it bleeds easily. Any unusual growth or color change in your mouth or on your lip may be a sign that something is wrong. Tumors on the floor of the mouth or under the tongue are the most problematic because they can go undiagnosed for a long period of time. Any lesion that you notice that does not heal within two weeks should be brought to the attention of your dentist. As with all cancers, early detection and treatment is critical. Visit your dentist regularly for oral cancer screenings.
